Watson-Guptill's all-time best-selling drawing book. A best-seller for 35 years! This is a

timeless classic that has taught generations of artists - and will teach generations more. When it was originally published in 1970, "How to Draw What You See" zoomed to the top of Watson-Guption's best-seller list - and it has remained there ever since. "I believe that you must be able to draw things as you see them - realistically," wrote Rudy de Reyna in his introduction. Today, generations of artists have learned to draw what they see, to truly capture the world around them, using de Reyna's methods. "How to Draw What You See" shows artists how to recognize the basic shape of an object - cube, cylinder, cone, or sphere - and use that shape to draw the object, no matter how much detail it contains.
