isbn:9780582291430

An Introduction to Bilingualism provides a comprehensive review of the most important aspects of individual and societal bilingualism, examining both theoretical and practical issues. At the level of the individual, it addresses such questions as: What is involved in the study of bilingual children? What are the patterns of bilingual language acquisition? In which ways do the language competence and the speech of bilinguals differ from those of monolinguals? Topics that sometimes arouse controversy are explored - such as the question of whether there is a relationship between bilingualism and a child's cognitive, psychological and social development. The book is also concerned with multilingualism, that is, bilingualism as a societal phenomenon. It focuses on such issues as language choice in bilingual and multilingual communities, national identity and the education of bilinguals. The inclusion of several case studies of European linguistic minorities serves to exemplify the topics dealt with at the theoretical level and to illustrate the linguistic complexities found in contemporary Europe.
