Investment techniques that make money, while saving time

Riding the Bull, Beating the Bear offers a simple, straightforward market timing technique. Using his extensively researched and back-tested Y-Process method, Edward Yanis shows investors how they can improve their portfolio performance-by doing one simple calculation every week. With a minimum of work, readers can benefit from a buy-and-hold, index oriented philosophy, and at the same time, preserve capital by getting out of the market before prolonged dips. For readers who don't want to get bogged down in complex investing strategies, Riding the Bull, Beating the Bear provides a low-intensity, active management style that is easy to learn and even easier to implement.
