Narrated in the form of a Powerbook entry by Dan Underwood, a computer programmer for Microsoft, this state-of-the-art novel about life in the '90s follows the adventures of six code-crunching computer whizzes. Known as "microserfs," they spend upward of 16 hours a day "coding" (writing software) as they eat "flat" foods (such as Kraft singles, which can be passed underneath closed doors) and fearfully scan the company email to see what the great Bill might be thinking and whether he is going to "flame" one of them.

Seizing the chance to be innovators instead of cogs in the Microsoft machine, this intrepid bunch strike out on their own to form a high-tech start-up company named Oop! in Silicon Valley. Living together in a sort of digital flophouse --"Our House of Wayward Mobility" -- they desperately try to cultivate well-rounded lives and find love amid the dislocated, subhuman whir and buzz of their computer-driven world.

Funny, illuminating and ultimately touching, Microserfs is the story of one generation's very strange and claustrophobic coming of age.

书评

貌似就我一人评了唉。。 据说这本书属于死前一定要读的100本书之一。
可是如果不是找到了Matthew的有声版，我才懒得看呢。。
