"Step-Up to Medicine" is your lifeline for the clinical years of medical school. This book was originally written by third-year medical students searching for the perfect review book-not finding it on the market, they wrote it themselves! Now in its third edition,

"Step-Up to Medicine" boils down the full scope of tested pathology in a single ingenious tool. Each element is tailored for immediate content absorption, and an all-new, full-color interior differentiate elements for even faster, more efficient review. And, "Step-Up to Medicine, third edition" provides two types of self-assessment - the kinds of questions you will ask yourself as a clinician plus USMLE-style practice questions. This review book gives you just the Step-Up to the medicine clerkship, accompanying shelf exams, and USMLE Step 2 that you need! New features for this blockbuster edition: full-color, updated interior design brings the content to you in a rousing, memorable style; full-color, updated art program illustrates concepts when a picture says it best-plenty of clinical images also supplement topics; new content on evidence-based medicine keeps you current and informed to guide your clinical decision making; expanded content on drug dosing is added where relevant. Classic features students swear by: complete coverage of high-yield medical topics ensures you are test ready; Clinical Pearls boxes help you "file away" clinical medicine connections for handy retrieval at test time; quick hits glimmering in the margins highlight highly testable material-just see how the sparks fly at test time. Bonus Material and study resources: eBook with the fully searchable text is available via thePoint; new 300 USMLE-style questions provide another means of self-assessment and practice for those exams; new audio clips of breath and heart sounds also available on the Point.

看得速度太慢过了借期==应试好书

还好吧，有些观念旧了

已经有第五版了，如果给所有缩写做个索引就更好了
