著者:Harry L. Van Trees

出版者:Wiley-Interscience

出版时间:2003-2-7

装帧:Paperback

isbn:9780471449676

Signal processing plays an important role in many diverse application areas, including radar, sonar, communications, seismology, radio astronomy, tomography, and communications. Now, by popular demand, acclaimed author Harry Van Trees' four-part encyclopedic treatment of signal processing is now collected into a set offering 25 years of information in a single source.
