In 1999 Robert Creeley received the prestigious Bollingen Prize in Poetry and was elected a Chancellor of the Academy of American Poets. Both honors made specific note of his experimental style, his long influence, and his ongoing importance. Creeley's 1998 collection, Life and Death, now available as a New Directions Paperbook, is the capstone of a career that has poignantly combined "linguistic abstraction with specificity of time and place" (R.D. Pohl, Buffalo News).
