

Turbulence Seminar

[Turbulence Seminar 下载链接1](#)

著者:Bernard, P.; Ratiu, T.;

出版者:Springer

出版时间:1977

装帧:

isbn:9783540084457

作者介绍:

目录: Lecture I Attempts to relate the navier-stokes equations to turbulence
Jerry Marsden
Pages 1-22
Appendix to Lecture I: Bifurcations, semiflows, and navier-stokes equations
Tudor Ratiu
Pages 23-35
Lecture II Theories of turbulence
Alexandre Chorin
Pages 36-47
Lecture III Dynamical systems and turbulence
Steve Smale
Pages 48-70
Lecture IV A phenomenological theory for the computation of turbulent shear flows
P. G. Saffman
Pages 71-82
Lecture V Fractals and turbulence: Attractors and dispersion
Benoit B. Mandelbrot
Pages 83-93
Lecture VII The structure of lorenz attractors
R. F. Williams
Pages 94-112
Appendix to Lecture VII: Computer pictures of the Lorenz attractor
Oscar Lanford
Pages 113-116
Lecture VIII a model for couette flow data
Rufus Bowen
Pages 117-134
Two attempts at modeling two-dimensional turbulence
Harland M. Glaz
Pages 135-155
Back Matter
Pages 156-158
