出版者:Springer

出版时间:2010-12-10

装帧:Paperback

isbn:9783642084737

Softcover reprint of hardcover 1st ed. 1999 Edition

This introduction to algebraic number theory discusses the classical concepts from the viewpoint of Arakelov theory. The treatment of class theory is particularly rich in illustrating complements, offering hints for further study, and providing concrete examples. It is the most up-to-date, systematic, and theoretically comprehensive textbook on algebraic number field theory available.

书评

1. 研究生阶段读过，算起来应该是2007年左右的事了。前两章处理的不错，比S. Lang的书要更容易入门 第三章当时缺乏一些基本的知识，没有读。随后的四、五、六三章是类域论。当时硬生生的读了下来。最有用的是Adele语言的那部分东西。第7章，对于Dedekind Zeta函数，其证明...
