What kind of man buys his grave at the age of eighteen and chooses to spend the rest of his life in a rest home at thirty-five? Meet Antoine, the curious hero of Laurent Graff's Happy Days, an odd young man who somewhat prematurely acquiesces to his terminal destiny. The ultimate fatalist, Antoine decides to play hooky from life at the Happy Days rest home. Despite the pronounced difference in age, he is accepted by the residents and quickly settles into a routine. He leads a peaceful and uneventful life there until the arrival of a dying woman with whom he forms a unique bond and goes on a very special journey. This darkly funny novel - the first of Graff's to be published in English - was awarded the Prix Millepages 2002.
