"Concepts in Biology" is a short, student-friendly text organized in a traditional manner. It has very little botany and presents a human-oriented approach to the animal unit. Professors and students appreciate the low cost of this title, and that it is written for students who are not biology majors.

看了“科学松鼠会”的文章《什么是科学》(<http://songshuhui.net/archives/52008>),特地找来读了第一章。
