Written in 1933, this classic, touching story focuses on a young man's gay awakening in the years between the World Wars and became an instant underground classic. Kurt Gray is a shy, bookish boy growing up in small-town Michigan. Even at the age of 13, he knows that somehow he is different. Gradually he recognizes his desire for a man's companionship and love. As a talented composer, breaking into New York's musical world, he finds the love he's sought. Considered to be one of the most important gay books ever written, this edition contains an updated epilogue and black-and-white photographs from the author's life.
