isbn:9780470845738

The definitive reference for any C programmer or for programmers needing to work with C programs.

Every book written about C refers frequently to the international standard that defines

the language, this will be a must-have companion volume for everyone who is serious about programming in this language.

- \* The complete, current C standard (ISO/IEC 9899-1999) as approved by international standards bodies (BSI and ANSI)
- \* The ONLY available bound version of the standard
- \* Includes the C rationale which provides a valuable insight into why certain decisions were made during the creation of the language
- \* An introductory chapter explains what the standards process is and how the reader can participate in the standards process
