When you're ready to roll up your sleeves and start taking advantage of GoLive CS2's powerful site management and collaboration capabilities, mobile authoring features, and enhanced CSS authoring tools, it's time to get the guide from the people behind the software. In these pages, The Adobe Creative Team uses a series of project-based

lessons to guide you through every feature of GoLive. Working at your own pace, using training materials created and tested in Adobe's own classrooms and labs, you'll soon be creating effective, efficient Web sites with GoLive CS2. Step-by-step instructions clearly detail toolbars, palettes, site architecture, CSS, image maps, and more. And plenty of attention has been paid to GoLive CS2's new features as well: enhanced live rendering, including small-screen rendering for mobile content development; innovative visual CSS authoring and mobile CSS support; visual SVG-Tiny authoring; enhanced site management, and more. Each chapter concludes with a review section to reinforce what you've learned, while the companion CD-ROM provides all files and images you need to complete the exercises in each chapter.
