著者: Ian Lloyd

出版者: SitePoint

出版时间: 2006-05-02

装帧: Paperback

isbn: 9780975240298

Build Your Own Website The Right Way Using HTML & CSS teaches web development from scratch, without assuming any previous knowledge of HTML, CSS or web

development techniques. This book introduces you to HTML and CSS as you follow along with the author, step-by-step, to build a fully functional web site from the ground up.

However, unlike countless other "learn web design" books, this title concentrates on modern, best-practice techniques from the very beginning, which means you'll get it right the first time. The web sites you'll build will:

Look good on a PC, Mac or Linux computer

Render correctly whether your visitors are using Internet Explorer, Firefox, Opera, or Safari

Use web standards so your sites will be fast loading and easy to maintain

Be accessible to disabled users who use screenreaders to browse the Web

By the end of the book, you'll be equipped with enough knowledge to set out on your first projects as a professional web developer, or you can simply use the knowledge you've gained to create attractive, functional, usable and accessible sites for personal use.

## 作者介绍:

Ian Lloyd is the author or co-author of a number of web development books, including SitePoint's Ultimate HTML Reference. He has contributed articles to numerous industry-leading sites such as A List Apart, Think Vitamin, and .net magazine. Ian is also the founder of one of the earliest online accessibility resources, accessify.com.

专业却又不是那么专业，好像是给新手读的，我是中间用户，不是很实用，不过书后配了方便查询的css、html附录
