Is there an explanation for the thousands of people who have disappeared in the Bermuda Triangle? What can we learn from Charles Lindbergh, Christopher Columbus, and Bruce Gernon-the co-author of this book-who have survived their frightening encounters in this region?

The Fog presents Gernon's exciting new theory of the Bermuda Triangle, based upon his firsthand experiences, reports of other survivors, and scientific research. Gernon and MacGregor intelligently discuss how a meteorological phenomenon, electronic fog, may explain the bizarre occurrences in this region: equipment malfunctions, disorientation among pilots, and time distortions. They also explore the fascinating history of this infamous region and its potential link to Atlantis, UFO sightings, and a secret navy base on Andros Island.

Rob MacGregor has written several books on New Age topics and has won the Edgar Allan Poe award in mystery writing. Both Gernon and MacGregor live in South Florida, on the edge of the Bermuda Triangle. Bruce Gernon is a pilot who has flown extensively in the Caribbean. He has appeared in many documentaries about the Bermuda Triangle.
