The new expanded edition of "HOW TO SUCCEED WITH WOMEN" adds another 5 years of research and feedback from readers to the decades of research behind the first edition. The success principles are now developed at greater length, dialogue from singles' coaching has been added, the exercises are done in sample format and special success issues (the shy man, the intellectual man and more) are treated. The author devoted more than 15 years to the single lifestyle industry and over 20 to psychiatric research in search of how men succeed. His findings are new insights and highly effective skills for men who wish to succeed -- now presented in greater detail in the new, expanded edition.

HOW TO SUCCEED WITH WOMEN tells men what it is in their makeup that women are looking for. It shows men how to make it obvious to the women they wish to connect with. This is a major advance past what is already known about female psychology. The book uses exercises -- at the end of most chapters -- to work the material into the reader and make him ready to live the material that creates success. The exercises are an enjoyable mix of neurolinguistic programming and visualization, crafted to awaken the reader to his winning ways.

This book is rich in fresh material on both the male and the female. Its chapter by chapter rehearsals of the things that work return the reader to life ready to succeed. It is written to bring effective new knowledge and skill to the reader in a way that feels easy and natural.

HOW TO SUCCEED WITH WOMEN has earned Playboy's Critic's Choice rating and has been in the most prominent catalogs, bookstores and websites (331 pages, laminated cover).
