The Yearbook provides a comprehensive overview of cutting-edge issues in environmental and resource economics. The expert contributors address some of today's most pressing environmental topics including:

• issues in water pricing reforms

• spatial environmental policy

• environmental equity and the siting of hazardous waste facilities

• strategies to conserve biodiversity

• corporate sustainability

• the double-dividend hypothesis of environmental taxes

• valuing environmental changes in the presence of risk.

The Yearbook will provide economists, scholars and practitioners working in environmental and resource economics with a comprehensive overview of the cutting-edge issues in the field.
