出版时间:1979-4-30

装帧:Paperback

isbn:9780521295512

Professor Hilary Putnam has been one of the most influential and sharply original of recent American philosophers in a whole range of fields. His most important published work is collected here, together with several new and substantial studies, in two volumes. The first deals with the philosophy of mathematics and of science and the nature of philosophical and scientific enquiry; the second deals with the philosophy of language and mind. Volume one is now issued in a new edition, including an essay on the philosophy of logic first published in 1971.

评论

A series of essays on machine functionalism and semantic externalism. Terrible(at least far from excellent) prose and phrasing though.

相当有洞见，一些长久以来的困惑在普特南这里得到了澄清。
