装帧:Paperback

isbn:9780521600811

This 2006 book was the first handbook where the world's foremost 'experts on expertise' reviewed our scientific knowledge on expertise and expert performance and how experts may differ from non-experts in terms of their development, training, reasoning, knowledge, social support, and innate talent. Methods are described for the study of experts' knowledge and their performance of representative tasks from their domain of expertise. The development of expertise is also studied by retrospective interviews and the daily lives of experts are studied with diaries. In 15 major domains of expertise, the leading researchers summarize our knowledge on the structure and acquisition of expert skill and knowledge and discuss future prospects. General issues that cut across most domains are reviewed in chapters on various aspects of expertise such as general and practical intelligence, differences in brain activity, self-regulated learning, deliberate practice, aging, knowledge management, and creativity.

评论

和牛津的手册相比，剑桥的易读性更好

后半部分最为经典

是本泛泛而述的书

旁征博引，通晓中西，纵观古今，就是为了帮你认识你自己

此书应该和剑桥学习科学手册结合起来看。少给一分怕骄傲。

(《新知客》，2010年8月。本来应该等到8月1日再发，但今天突然发现此文已经被在网上泄漏出来了！)

随着畅销书《异类》的流行，“练习一万小时成天才”这个口号现在是尽人皆知。也许仍然有不少人相信那些不世出的天才必有天生的神秘能力...
