Psychology: The Science of Mind and Behaviour has been described as the 'trailblazer in the psychology textbook revolution' and 'the psychology student's "bible"'. It has established itself as the benchmark introductory psychology textbook. Its 50 chapters cover every conceivable topic -- from substance abuse to health psychology, from criminological psychology to moral development. This fifth edition has been fully revised to incorporate significant recent research findings and provides a comprehensive resource for readers at all levels. Now in full colour and generously illustrated to bring the text to life, this new edition is more reader-friendly than ever and features: * a concise introduction and overview for each chapter * full chapter summaries to aid revision and consolidate learning * interactive questions to stimulate discussion and promote understanding. A brand new CD-Rom in the back of the book supplies fantastic extra resources for every chapter, including: * drag-and-drop exercises * self-assessment questions * sample essay answers * downloadable schemas * useful websites and further reading linking to every chapter. Psychology: The Science of Mind and Behaviour 5th edition is the definitive introduction to psychology. Essential reading for all psychology students and those following a wide range of courses -- including health, nursing and social work -- as well as the interested general reader.
