In the spare, elegant style that has won her international acclaim, Annie Ernaux writes of losing oneself in love then losing love itself in this, her standout work. Blurring the line between fact and fiction, an unnamed narrator plots the emotional and physical course of her all-consuming affair with a married man, providing a glimpse of the true meaning of passion. Featured in this impressive work from one of France's most important contemporary literary voices is a reading group guide as well as an original author interview.
