出版时间:2002-01-02

装帧:Paperback

isbn:9781931841214

This book offers intermediate to advanced IT professionals the chance to learn the inner workings of new SOAP/XML developments by working through a real-life application. Readers will design an accounting product for the Web using ASP .NET and Web Services. The application can be written in any .NET language and all

communication is over the Internet. Readers will walk away feeling confident about developing real-life projects using ASP .NET.
