出版时间:1994-04-28

装帧:Paperback

isbn:9781555446017

Filled with code-based and windowing examples, this book is for the SAS end-user who wants to learn to access data from a number of other software vendors' relational databases and PC file formats. This book shows you step-by-step how to create and use SAS/ACCESS descriptor files in SAS programs. Queries and views created with the SQL Procedure Pass-Through facility are also illustrated.
