In this stunning debut, Betsy Tobin spins a classic tale of gothic suspense. Immersing readers in Elizabethan England, she masterfully evokes a heady place where science and superstition walk hand-in-hand and sensuality and violence are masked by the merest veneer of gentility.

...some people are the center of their world, and others are the spokes.

The center of one village was Dora, the great-bellied prostitute whose lush curves gave solace to men even as her compassion and honesty drew the company of women. So when Dora is found dead in an icy ravine, her loss impacts everyone. So, too, does it torment a young chambermaid at the Great House. Determined to discover the truth, she finds that Dora left behind many unanswered questions, along with a huge, slow-witted son, a boy of eleven trapped in a man's body. The deeper she digs, the more the mystery of Dora's life is revealed, until a terrible secret is laid bare.

Betsy Tobin was born in Ohio and emigrated to England in 1989. A journalist, playwright, and prize-winning short-story writer, she lives in London with her husband and four children. Bone House is her first novel.
