The very first picture book to address the most important component of our computer age . . . the dot!

Meet the little dot that lives inside your computer. When you have switched it off, he takes the opportunity to visit his friend, the Duchess of Amalfi. He whizzes through cyber space to her place, for tea. Sometimes he is full of ink, and wobbly, and sometimes he isn't. There are soldiers in white uniforms at the bottom of the hill, that he likes to cover in ink — and then he dances with them, because he is ashamed of himself. He's pretty good at dancing — as long as he doesn't wiggle he won't make a single blot.

From the Trade Paperback edition.
