William of Ockham (c. 1285-c. 1387) was the most eminent theologian and philosopher of his day, a Franciscan friar who came to believe that the Avignonese papacy of John XXII had set out to destroy the religious ideal on which his order was based: the complete poverty of Christ and the Apostles. *A Short Discourse on Tyrannical Government* is an attack on the claims of the medieval Church, specifically the papacy, to universal spiritual and secular power. Written at the time of the emergence of the European nation-states, Ockham's work issued a direct hard-hitting challenge to the claims of limitless papal power. The text is accompanied by a full bibliography, a chronology and an introduction setting his work in its intellectual and historical context.
