装帧:Hardcover

isbn:9780821257555

We share about 98 percent of our DNA with chimpanzees, our closest biological cousins. And never have the similarities between simians and humans been so amusingly and brilliantly captured as in MONKEY PORTRAITS. Jill Greenberg has spent 15 years photographing celebrities--from Clint Eastwood to Drew Barrymore--for

leading publications, but has recently focused on actors of a different sort. She has been photographing monkeys and apes, many of whom have appeared on film or in television shows. Her intimate portraits of these animals convey a startling range of emotions and personalities, and evoke an almost eerie sense of recognition. Each of these 76 amazingly anthropomorphic photographs will remind you of someone you know. These monkeys in all their glory will cause you to laugh out loud and to wonder just how different we truly are.

评论

看它们的眼睛时最觉得像是在看另一个人

-----  
可爱的猩猩猴子

-----  
Monkey

Portraits是一本令人惊奇的动物摄影集!透过各种灵长类动物(没有人类)的室内肖像，细致至极的毛发、颜色等体貌特征和摄影师所捕捉到的神态光影、动物的姿态，猴子的神情样貌與人是多麼的接近!它充分的让我体会到，"观看动物，其实是让我们去反思自身與人类"。我很好奇它是如何做到的!
