We live in a world of sensory overload and people's dreams have come to reflect that complexity. No longer do people dream that they are standing naked in the middle of a conference room, in front of an audience of their peers. Instead, dreams might involve standing naked in a conference room with a mobile in their hand and an incoming call from Donald trump. What's that all about? I HAD THE STRANGEST DREAM will answer such questions and help readers break down the meaning of their dreams. 21st century dreamers will finally have the tools they need to tap in into the power of their dreams in order to become more productive and tranquil human beings.
