This playful and original picture book takes three friends through the days of the week as well as the seasons of the year. Monday is our main character and as we move

through the days of the week he becomes smaller and smaller until Sunday when he virtually disappears in a snowstorm. His two freinds go off to look for him. They too move through the days of the week as well as the seasons of the year as they search for their friend. At the end they finally find him, and he is just a little bit different, for as we know, no one Monday is the same as the next. Please note that there are five different weights of paper used in this book and as the reader moves from the lushness of spring into the browns of autumn and the icy whiteness of winter the paper becomes thinner and thinner. Additionally, the paper is textured with a Braille-like effect during the snowstorm at the end of the book.
