In this ground-breaking book, Anna Wierzbicka brings psychological, anthropological and linguistic insights to bear on our understanding of the way emotions are expressed and experienced in different cultures, languages, and social relations. The expression of emotion in the face, body and modes of speech are all explored and Wierzbicka shows how the bodily expression of emotion varies across cultures and challenges traditional approaches to the study of facial expressions. This book will be invaluable to academics and students of emotion across the social sciences.
