Book Description

Shortly after the conclusion of the Second World War, Edith Pargeter made her first trips to a country in whose struggles for freedom she would take a passionate interest for the rest of her life: Czechoslovakia. Deeply affected by all she saw-these sojourns "obviously changed her life," according to her biographer-Pargeter chronicled her travels in *The Coast of Bohemia*, originally published in England in 1950. It is an unexpectedly fervent volume, offering intriguing perspectives both on a country newly succumbing to Soviet rule and on the normally retiring author as a citizen of the wider world, and it will appeal strongly to fans of Pargeter's many other books, including *The Brothers of Gwynned Quartet* and those written under her pen name Ellis Peters.
