Synopsis

Hector Kipling is an artist. He has his health, loving parents, a beautiful girlfriend, good mates, and talent in abundance (or at least, more abundance than most, and certainly more than his friend Kirk, if not quite as much as their other friend, Lenny - although, actually, Hector would argue that while Lenny's received more recognition for his art, most of that recognition is misplaced). What more could he ask for (besides the same level of recognition that Lenny gets, that is)? But once Hector's life starts to unravel, it doesn't take long at all for it to fall completely and irreparably apart. In fact, as Hector discovers, it's amazing just how quickly a life can disintegrate. From settees to stalkers, con-men to corpses, S&M to the Tate Modern, "The Late Hector Kipling" is a warm and witty novel about the not so warm and witty world of art, and death.

慢慢消灭旧书。不知为何总觉得DT特别适合用来脑补男主

神啊，终于读完了。到事情急转直下（大约250页吧）之前都挺好，差点就打4星鸟，可惜啊可惜。
