Technology of Machine Tools provides state-of-the-art training for using machine tools in manufacturing technology, including up-to-date coverage of computer numerical control. It includes an overview of machine trades and career opportunities followed by theory and application. The text is structured to provide coverage of tools and

measurement, machining tools and procedures, drilling and milling machines, computer-aided machining, and metallurgy. There is expanded coverage of computer-related technologies, including computer numerical control (CNC) and computer-aided design and manufacturing (CAD/CAM).
