From the author of the classic study of the aviation industry, *The Sporty Game*, a new book that chronicles the high-stakes rivalry between the world's two largest aircraft manufacturers—companies that will bet the house on a single airplane.

Long one of America's most successful and admired corporations—and its biggest exporter—Boeing struggled to maintain 50 percent of the market share for commercial aircraft after being overtaken by the European upstart Airbus in the late 1990s. But Airbus did not remain on top for long. By 2006, the company suffered from mismanagement and had adopted the kind of complacent, risk-averse culture that had once characterized its competitor.

Incorporating interviews he conducted throughout the industry—with everyone from company leaders, past and present, and Wall Street analysts to design engineers and factory workers—John Newhouse takes us inside these two firms to help us understand their struggle for supremacy in a business based as much on instinct as on economics. He examines the critical issues that Boeing has faced in recent years, including its difficult merger with McDonnell Douglas, its controversial move from Seattle to Chicago, and a series of corporate scandals that made front-page news. And he analyzes the troubles that have beset a once ascendant Airbus, notably an institutional structure aimed at satisfying the narrowly focused interests of its European stakeholders. Newhouse also explores the problems that now face Boeing and Airbus alike: potential competition from China and Japan, the challenge of serving burgeoning Asian markets, and the need to undo years of mismanagement.

Boeing Versus Airbus is a fascinating, informed, and insightful tale of success, and failure, in the turbulent, do-or-die world of the aircraft industry.

评论

2007年的一本书，快近十年的书。书里纷乱地介绍了空客和波音在市场，管理，创新，竞争和政治上的故事。对波音的管理方式批评比较多，尤其是outsourcing，把机翼全给了日本。空客里最有意思的是作者对A380的市场预言，以及Airbus和EADS之间最终的关系走向。航空行业，满是政治。

书评

Competition between Airbus and Boeing is a result of the two companies' domination of the large jet airliner market since the 1990s, which is itself a consequence of numerous corporate failures and mergers within the global aerospace industry over the years.
