This book offers an annotated reference guide to the life and works of this important American composer, whose life spanned the 20th century. Covering Copland's entire career, the work opens with a unique chronological chart showing the three spheres of Copland's career: Biography; Compositions; Writings. The work balances the comprehensive annotation of Copland's published and manuscript articles and books with a selective compilation of the significant secondary literature. This book illuminates Copland's contributions as conductor, critic, commentator, author, mentor, and teacher, in addition to composer and musician.</P>
