Thought-Provoking, erotic, sharp-witted, and totally riveting, Scar Culture marks the debut of a groundbreaking writer. With the power of the spoken word and the authenticity of a research document, Scar Culture follows the lives of Click, Fright, and their dysfunctional therapist Sad. Using experimental, dangerous techniques, Sad tries to bring Click and Fright out of the stupor to which they have succumbed from childhood abuse. Tempering the story with the darkest humor, Toni Davidson makes us confront the meaning of being human in this challenge to psychotherapy.
