isbn:9781852232641

Cacti and succulents are ideal houseplants, needing little care and providing unusual and colourful displays. This book looks at the increasingly wide variety of plants now available, and assists the beginner to choose and cultivate many of the popular types. Full details are given on feeding, watering, potting, and on displaying the collection to

its best advantage. An A-Z listing of over 75 varieties shows the wide diversity of shapes, sizes, and effects that can be grown.
