著者:David L. Powers

出版者:Academic Press

出版时间:2005-10-19

装帧:Hardcover

isbn:9780125637381

Boundary Value Problems is the leading text on boundary value problems and Fourier series. The author, David Powers, (Clarkson) has written a thorough, theoretical overview of solving boundary value problems involving partial differential equations by the methods of separation of variables.

Professors and students agree that the author is a master at creating linear problems that adroitly illustrate the techniques of separation of variables used to solve science and engineering.

- * CD with animations and graphics of solutions, additional exercises and chapter review questions

- * Nearly 900 exercises ranging in difficulty

- * Many fully worked examples
