isbn:9780890512852

Riding the waves and exploring the depths, popular characters Tracker John and his sidekick, D.J., take us on a special exploration of the seas. This full-color children's

book helps us understand this mysterious frontier, while introducing young readers to a wide variety of God's ocean creatures. A delightful children's story with plenty of teaching information, this book will make an instant connection with kids.

A study section in the back of the book of terms, facts, and what the Bible says about the ocean includes:

- The oceans cover nearly three fourths of the earth. The water is so deep that all the land could fit inside and still be covered by 10,000 feet of water.
- A starfish can move in any direction without turning around.
- Originally, there was only one ocean.
