Foundation Flash 5 gives you all the skills you need to get started in the latest version of Flash. It takes you from your first drawing and animation project in Chapter 1 through to a strong foundation in the sophisticated ActionScripting capabilities now built into Flash 5. It is a thorough and practical, tutorial led book, where each chapter builds into a complete design example - reinforcing what you've learnt in that section

and how it can be applied in real design projects. By the end of the book you'll have an expert-level, Flash-rich website, and the skills to develop and modify your own Flash 5 effects. Professional-level design with Flash has taken a quantum step up with Flash 5. Foundation Flash 5 provides you with all the climbing gear you need for the steeper learning curve. You'll break a sweat. But when you get there the view from the top is really worth the effort!

Written by the renowned team of Flash experts who bring you the great tutorials on Virtual-FX.net, this book will teach you what you need for designing cutting edge Flash 5 effects.
