isbn:9780806927756

Casting lots, astrology, witchcraft, palmistry, dowsing, tarot, and so many more practices promise to foretell the future. Now you can choose exactly which ones to use from a comprehensive, fully illustrated introduction to a wide range of different systems. Need to interpret a dream symbol or an omen such as an animal crossing your path? It's here. Want to know what a card or number means? That's here, too. So

are guidance on crystal balls and oracle pronouncements, a visual layout of the fortune teller's mah jongg, images and explanations of runes, a presentation of Native American Sacred Path cards, and psychological and spiritual insights. From the sacred Eye of Horus, 25 stone tablets designed to stir personal development and creativity, to the Angel's Script, supposedly based on the constellations, the breadth of knowledge both ancient and new is astounding.
