Rich Dad said: "The faster your money moves, the higher your returns and the lower your risk." Conventional financial wisdom recommends you save money and invest for the long term. In other words, park your money. That was not the advice of Rich Dad. His advice was to increase the velocity of your money... not park your money. We all know that markets go up and markets go down. Before the next crash comes along - and takes your money again - find out how you can keep your money moving rather than parked in your broker's account.
