Micronations: The Lonely Planet Guide to Home-Made Nations is a travel guidebook published by Lonely Planet. It has also been published under the name Micronations: The Lonely Planet Guide to Self-Proclaimed Nations.

Though it is conceived as a non-fiction guidebook to places that readers can potentially actually visit, and includes fact-checked data on both the micronations themselves and nearby commercial hotel, restaurant and transport establishments and facilities, it is written in a reasonably light-hearted and entertaining tone.
