The Yearbook presents student work from the courses of architectural design, technology, and visual design in the Department of Architecture at the ETH Zurich. The work was produced in the semester studios of 2011/2012, as part of a Master Thesis

project, or within a Master of Advanced Studies programme (MAS). The Institute for the History and Theory of Architecture (gta), the Institute of Technology in Architecture (ITA), the Institute for Historic Building Research and Conservation (IDB), as well as the Network City and Landscape (NSL) with its Institute for Urban Design (ISB), the ETH Studio Basel/Contemporary City Institute, and the Institute for Landscape Architecture (ILA) present selected projects from their teaching and research activities. The ETH CASE, the Future Cities Laboratory (FCL), and the Werner Oechslin Library Foundation add to the spectrum of research platforms. The Yearbook thus presents the entire breadth of approaches and disciplines that characterize this school.

讲真，瑞士的德语很多都是专八词汇，还是因为要出书所以都写的比较生涩？目前无从查证，希望有机会去当地听听大家交流的语言。

了解ETH的教学结构可以看这本书，感觉这种从平面绘画，立体雕塑，到小的艺术家工作室，城市规划，课题调研，材料的研究，旧建筑改造，立面改造，从建筑不同的角度来步步推进的方式，比起按照建筑体量大小层层进阶的教学模式，似乎来得更有意义一些。类型的广泛涉猎，总是不及把建筑的各种语言拿来进行深入的研究。
