A book full of information on spirit orbs. The term is discussed and the confusion existing within the literature clarified. Also there are 98 quite intriguing colour photographs displayed. (Seems to be the only book in relation to this topic in the world) "Mr. Sercombe's insight to the enigma of the orb phenomena is a fantastic journey towards the discovery of what modern day ghost hunters find all too often. This is a magnificent contribution to the art of paranormal investigation." William R. Napier floridaghost.com "I congratulate you on your enthusiasm in wishing to bring spirit orbs to a wider public attention through a book". Roger Burman, B.A. President/Founder The British School of Spiritual Knowledge
