出版时间:1999-01-15

装帧:Paperback

isbn:9780896035263

Stephen Paddock and a highly skilled panel of experts lead the researcher using confocal techniques from the bench top, through the imaging process, to the journal page. They concisely describe all the key stages of confocal imaging—from tissue sampling methods, through the staining process, to the manipulation, presentation, and publication of the realized image. Written in a user-friendly, nontechnical style, the methods specifically cover most of the commonly used model organisms: worms, sea urchins, flies, plants, yeast, frogs, and zebrafish. The powerful hands-on methods collected here will help even the novice to produce first-class cover-quality confocal images.

专业书最怕版本太老。不过入门用的话略读一番还是颇有收获。进一步让人质疑“seeing is believing”的思想：就算再怎么努力，confocal看到的不过也只是一连串的artifact啊——
