isbn:9780195209938

The extraordinary growth enjoyed over the last several decades by many East Asian countries has amounted to nothing less than an economic miracle. Employing unorthodox policies, Hong Kong, Indonesia, Japan, Malaysia, the Republic of Korea, Singapore, Taiwan, and Thailand have all produced dramatic results with far-reaching

improvements in human welfare and income distribution, leading many to ask whether a similar achievement can be duplicated elsewhere. Written for the nonspecialist, this World Bank Policy Research Report--the first in an important new series--discusses in detail the means by which these high-performing Asian economies (HPAEs) realized their staggering success between 1965 and 1990. Examining how these countries stabilized their economies with sound development programs that led to fast growth, the book also shows how they shared the new prosperity by making income distribution more equitable. The book makes clear how the HPAEs promoted rapid capital accumulation by making banks more reliable and encouraging high levels of domestic savings, while universal primary schooling and better primary and secondary education quickly increased their skilled labor forces. Also included are illustrative examples of productive agricultural programs, modest tax policies, the modification of price distortions, foreign technology and investment, and the cooperation of government and private enterprise. Exposing to a broad audience the revolutionary process that transformed East Asia into the collection of economic juggernauts that it is today, this provocative World Bank report offers wisdom for today's up-and-coming markets, highlighting the policies that will make a difference as well as those that, despite their effectiveness in the Orient, could prove disastrous elsewhere.

作者介绍:

The World Bank Group is a group of five international organizations responsible for providing finance and advice to countries for the purposes of economic development and poverty reduction, and for encouraging and safeguarding international investment. The group and its affiliates have their headquarters in Washington, D.C., with local offices in 124 member countries.

评论

蛮扎实的研究，唯一可惜的是有些泛泛，而且过了三四年东亚金融危机就出现了，有被打脸的嫌疑。形成report上啰啰唆唆，比如说完全可以把policy部分分成export-push, financial reform, education等等，这样400页完全可以缩短到250页。

近年来对于IMF, the World Bank等组织批评声不断。作为克林顿任期主要的经济扩张手段，这些组织通过改革换贷款，成功实现大国资本操控小国经济。从侧面反映，科学/经济研究的结论也可能被很多因素左右。It is, after all, a dog-eat-dog world.

policies are just one thing...没有外界条件请问你去哪export oriented呢？何况还有我们laissez-faire的Hong Kong 但至少这本书给了我很多gov policies的素材 免去了找资料的烦恼 感恩
