A breathtaking and beautiful exploration of our planet, this groundbreaking book accompanies the new BBC One TV series, providing the deepest answers to the simplest questions.

‘What is motion?’

‘Why is every snowflake different?’

‘Why is life symmetrical?’

To answer these and many other questions, Professor Brian Cox uncovers some of the most extraordinary natural events on Earth and in the Universe and beyond.

From the immensity of the Universe and the roundness of Earth to the form of every single snowflake, the forces of nature shape everything we see. Pushed to extremes, the results are astonishing. In seeking to understand the everyday world, the colours, structure, behaviour and history of our home, we develop the knowledge and techniques necessary to step beyond the everyday and approach the Universe beyond.

Forces of Nature takes you to the great plains of the Serengeti, the volcanoes of Indonesia and the precipitous cliffs in Nepal, to the humpback whales of the Caribbean and the northern lights of the Arctic. Brian will answer questions on Earth that will illuminate our understanding of the Universe.

Think you know our planet?

Think again.

## 评论

我觉得不太适合用来听，还是需要阅读，慢慢理解。听是听得一知半解……Samuel West读得真好啊，平和中正，声音有股透亮的感觉。

-----  
听书时，行在户外，世间一切成了“阅读”的广阔背景——踏树荫洒落的阳光，想沉思光速的爱因斯坦；看草地欢畅跃蹦的松鼠，耳边他细细道来地球生命之源；听风扬丛林叠浪，见星月诞生，潮起潮落。他说没有一片相同的雪花，精妙万变的六角形可溯其幻化——“生”，而每一个生命都是其物种演化数百万年的微妙缩影——” They are but the shadows of a grandeur 4-dimensional story.”  
这哪是科普，简直是首物理长诗。朗诵的Samuel West，平缓柔和中徐徐透出一份绵长深情，和Brian Cox实在太贴配了。:)
