装帧:Paperback

isbn:9780745630854

Ageing populations represent a key global challenge for the twenty-first century. Few areas of life will remain untouched by the accompanying changes to cultural, economic and social life. This book interrogates various understandings of ageing, and provides a critical assessment of attitudes and responses to the development of ageing societies, placing these in the context of a variety of historical and sociological debates. Written in a highly accessible style, this book examines a range of topics, including demographic change across high- and low-income countries, theories of social ageing, changing definitions of 'age', retirement trends, family and intergenerational relations, poverty and inequality, and health and social care in later life. The book also considers the key steps necessary in preparing for the social transformation which population ageing will bring. Ageing provides a fresh and original approach to a topic of central concern to students and scholars working in sociology, social policy and wider social science disciplines and the humanities.

Key Concepts

這個系列看起來是概念的普及，其實能夠幫助梳理基本學術脈絡。這本對於Ageing的社會面向理解有幫助。特別是能夠幫忙釐清幾種理論視角的異同，蠻有助益的。不過，最後在New pathways for Later Life部分感覺有點接不上前面宏大的分析。
